

TIAGO GIL

FRONTEND DEVELOPER

📍 Portugal, Almada 📞 930449280 ✉ talmeidagil@gmail.com 🌐 thetiagogil.com 🐙 github.com/thetiagogil

Frontend Developer specializing in React, Next.js, and TypeScript, with experience delivering production-ready applications and modernizing legacy systems. Focused on building scalable frontend architectures and clean, intuitive interfaces. Comfortable working across the full stack when needed.

WORK EXPERIENCE

Frontend Developer - Aquasis, Oeiras - Built a core module for the company’s main platform within a cross-functional team. - Developed scalable frontend features using React, ensuring maintainability and performance. - Worked on the migration from a legacy jQuery-based system to a modern React architecture. - Led UI/UX decisions within the team, translating requirements into clear and usable interface designs. Tech stack: React, TypeScript, Bootstrap, Zustand, PostgreSQL.	Apr 2025 - Present
Full-stack Developer - Talent Protocol, Lisbon - Worked across multiple products in a web3 ecosystem, primarily on frontend. - Built the Build.top app frontend from scratch based on Figma designs. - Implemented features, UI improvements, user feedback and bug fixes across all applications. - Maintained the internal design system components. Tech stack: React, Next.js, TypeScript, Material UI, Joy UI, PostgreSQL, Supabase.	Mar 2024 - Feb 2025
Full-Stack Developer (Apprenticeship) - Subvisual, Braga (Remote) - Developed a full-stack internal platform for team and skill management. - Built a web3 application integrating frontend with smart contracts. - Worked closely with senior developers in a production-like environment. Tech stack: React, TypeScript, Material UI, Joy UI, Supabase, PostgreSQL, Solidity.	Dec 2023 - Feb 2024
Architect - CR Espassos, Almada - Worked in a multidisciplinary team across architecture and engineering projects. - Led and mentored junior team members, assigning tasks and supporting their technical growth.	Aug 2022 - Aug 2023

PROJECTS

Uparque (In Progress)

- Developing a web platform for a coffee shop, focused on modern UI and usability.
- Translating real business requirements into a functional and responsive app for real-world use.

Tech stack: React, TypeScript.

Poketracker (In Progress)

- Building a full-stack platform to track progression across games using structured data systems.
- Designing a scalable database architecture and tracking logic to support complex data relationships.
- Optimizing for performance, usability, and long-term maintainability.

Tech stack: Next.js, TypeScript, ShadCN, Tailwind, Supabase.
